

BobCat Meadows Metropolitan District

PO Box 463, Woodland Park, Colorado 80866

Meter Replacement Announcement.

To: BobCat Meadows Metropolitan District / Southfork Subdivision water users.
From: BobCat Meadows Metropolitan District Manager.
Date: 01/08/2026

Dear Southfork Residents,

The BobCat Meadows Metropolitan District board has decided time has come to replace the failing water meters within the water system.

The new water meters chosen to replace the existing water meter in your home is a highly accurate, lead-free brass, ultrasonic, smart water meter for residential applications. The meter register is digital and will move the Metro District into the future of water metering and water meter reading.

This new water meter will fit in place of your home's existing water meter without the need for any plumbing changes within your home.

The Metro District board has contracted with Mountain States Pipe & Supply to have the new water meters installed.

The project manager for the new water meter installations at Mountain States Pipe & Supply is Nicholas Racca. Nic can be reached by phone at (719) 634-5555 or by email nracca@msps.com Please contact Nic by email to schedule your water meter replacement.

If you receive a phone call, or an email from Nic, please contact him back to schedule your water meter replacement.

If the BobCat Meadows Metropolitan District does not have a current phone number or email address on file for your water billing account, Nic will be leaving a note on your door. Please contact Nic to schedule your water meter replacement.

Thank You!

Dave & Debbie Stanford

District Managers, BobCat Meadows Metropolitan District/Southfork Subdivision
